## DETAILED ACTION

### *Election/Restrictions*

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1-11, drawn to a lead assembly connection system, classified in class 607, subclass 36.
  - II. Claims 12-14, drawn to a method for connecting a single lead electrode to a pulse generator, classified in class 607, subclass 37.
  - III. Claims 15-17, drawn to a method for connecting one or more circumferential electrodes to a pulse generator, classified in class 607, subclass 38.
  - IV. Claims 18-20, drawn to a method for connecting a pair of linear electrodes to a pulse generator, classified in class 607, subclass 38.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I and II-IV are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case, the methods could be performed to permanently, as opposed to reversibly, connect the electrode lead to the pulse generator.
3. Inventions II, III and IV are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if

Art Unit: 3762

they are shown to be separately usable. In the instant case, invention II has separate utility such as use with a single electrode for neurological stimulation. Invention III has separate utility such as use with multiple circumferential electrodes for epicardial stimulation. Invention IV has separate utility such as use with two linear electrodes for neurological stimulation. See MPEP § 806.05(d).

4. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

5. A telephone call was made to Elizabeth Belden on 9/20/2005 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

6. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Michael Kahelin whose telephone number is (571)272-8688. The examiner can normally be reached on M-F, 9-5.

Art Unit: 3762

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Angela Sykes can be reached on (571)272-4955. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
